ESM_3. Diatom taxa list from saline aquatic habitats of Kenya, Namibia, and India, frequented by Lesser Flamingos on search for food algae.

Frequency is listed according to following code: 3 (mass development or very numerous), 2 (numerous), 1 (seldom), x (single occurrence), in consideration of other algae and cyanobacteria. Ecological preferences FW: fresh water; BW: brackish water, SW: sea water; ISW: inland salt water. On the bottom of the table the sum of preferences calculated: only FW or only BW/SW preference and ISW species, as sum of occurrence and sum of frequency (x were assessed as 0.2).
